

Software Features - iView Developer

- Dynamic multi-lingual user interface with Unicode, offering screen text support for multiple languages
- All designs, macros and upload/download operations can be protected by passwords
- In-built serial port, Ethernet, USB and MicroSD card allows for downloading of runtime data
- User configurable script for improved functionality
- Comprehensive index registers are included for modifying device addresses in runtime
- Review and investigate important events using the Operation Log
- Supports over 380 industrial communication protocols inc. Modbus, BACnet MSTP/BACnet IP for 3rd party device communication
- Offline simulator to enable testing of the program before downloading to the iView

Configurable Toolbars

Icon Display Improves Work Efficiency

Shortcut icons designed to show objects, figure type, and operations improving work efficiency

Frequently used objects and figures can be registered as favourites

Dialog Box

The property dialog is displayed by double-clicking the object or figure

Figure changes are immediately reflected on screen, thereby simplifying the process and reducing errors

Project Workspace

Intuitive Tree Display Makes Runtime Development Easy

Easy to create, develop, and manage project property efficiency by project-based management worksheets

Screen Design Worksheet

Smart Screen Design

Easy-to-view screens during runtime development, adjustable based on user-oriented application

Intuitive Error Messaging

Compile & Simulate Results

By double-clicking on the error message after compilation, it will jump to the specific place where the error is located
